Gene Yang

gyang7@uw.edu | gyang0.github.io | linkedin.com/in/gyang0

Education

University of Washington – *B.S. Physics, minor Greek* *Expected 2030*
Purple & Gold Scholarship

Stanford Online High School 2026
Relevant coursework: Light & Heat | Modern Physics | Introduction to Quantum Computing
Linear Algebra | Differential Equations | Real & Complex Analysis
GPA: 3.98/4.0

Research Experience

Husky Satellite Lab, University of Washington Oct 2026 – Present
Condensed Matter Research Team

- Worked with a team to create a simulation of radiation effects on CubeSAT materials
- Researched condensed matter and quantum field theory to develop simulation physics

Department of Physics & Astronomy, Seoul National University Jan 2026
APhO Candidate

- Trained in experimental physics at Seoul National University's labs
- Analyzed optical data, designed experiment procedures, fine-tuned lab equipment
- Shortlisted (17 nationwide) for Korea's APhO & IPhO team by passing theoretical exam

Department of Physics, Korea Advanced Institute of Science & Technology Jun 2025 – Jul 2025
Lab Trainee

- One of 100 chosen nationwide from standard high schools
- Collected data for experiments using PASCO Capstone and visual tracking software
- Assisted KAIST professors with demonstrations and lab experiments

Additional Experience

Science Olympiad Volunteer, University of Washington Sep 2026 – Present
Test Writer

- Wrote tests for Lincoln High School Science Olympiad 2027 and University of Washington DubSO 2027
- Worked with a team to design problem sets for Division B & C Thermodynamics

Dickinson College Commentaries, Dickinson College Jun 2026 – Jul 2026
DCC Summer Intern

- Applied OCR software to create reading guides for Petronius's *Satyricon*
- Analyzed 500+ pages of digital transcripts, researching across 4 databases
- Collaborated with 9 fellow interns to publish online Latin resources for Dickinson College

Publications

2) Arjun Kumar, **Gene Yang**, Turiya Misra, Francis Kagai (2026). "Quantifying Attacker Payoff in Harvest Now, Decrypt Later Attacks: A Persistence-Based Framework for Trade Secret Risk."
Journal of Cybersecurity Education, Research, and Practice

1) **Gene Yang** (2026). "Details Matter: Quantum Advantage in Three-Choice Prisoner's Dilemmas."
De Novo: Stanford OHS Research Journal (vol. 16)

Awards

Selected, Schar Young Scholars Research Program, George Mason University 2026
Selected, Boston University High School Honors Program, physics track 2025

Ribbon Award, CAMWS College Greek Exam 2026
1st Place, CAMWS International Latin Translation Exam 2025
Gold Medal, National Latin Vocabulary Exam 2025

Skills

Programming: C++, Java, Python, JavaScript, HTML/CSS, Bash, Git, LaTeX
Data Analysis: SciPy, Qiskit, R
Languages: English, Korean, Latin, Ancient Greek
