

Gene Yang

geneyang702@gmail.com | gyang0.github.io

Education

Stanford Online High School 2026
Relevant coursework: Light & Heat | Modern Physics | Introduction to Quantum Computing
Linear Algebra | Differential Equations | Real & Complex Analysis
GPA: 3.98/4.0

Awards

Selected, Schar Young Scholars Research Program, George Mason University 2026
Shortlisted, Asian Physics Olympiad Korean representative (17 nationwide; standard high schools) 2026
Selected, Boston University High School Honors Program, physics track 2025
Top 8% Score, F=ma Exam, USA 2025
Ribbon Award, CAMWS College Greek Exam 2026
1st Place, CAMWS International Latin Translation Exam 2025
Gold Medal, National Latin Vocabulary Exam 2025

Experience

Summer Intern, Dickinson College Commentaries, Dickinson College June 2026 – July 2026

- Created vocabulary lists and commentary for Petronius's *Satyricon*
- Published free online Latin resources for Dickinson College's website
- Used AI models and OCR software to speed up commentary creation

Selected Camper, International Physics Olympiad Training Camp, South Korea Jan 2026

- One of 45 campers chosen nationwide from standard high schools
- Attended daily lectures on solving olympiad-level physics problems
- Successfully completed all experimental labs, passed final theoretical exam

Junior Lab Assistant, Korea Advanced Institute of Science & Technology (KAIST) June 2025 – Jul 2025

- One of 100 chosen nationwide from standard high schools
- Collected lab data for experiments with PASCO Capstone
- Conducted heat engine & collision tests with KAIST faculty

Co-Leader & AV Editor, Pixelstra: Stanford Online High School String Orchestra Aug 2022 – Present

- Edited performance audio/videos for 4 years
- Arranged yearly performances at Graduation, Homecoming, & Pixel Festival
- <https://www.youtube.com/@ohspixelstra> 

Selected Papers

2) Arjun Kumar, **Gene Yang**, Turiya Misra, Francis Kagai (2026). "Quantifying Attacker Payoff in Harvest Now, Decrypt Later Attacks: A Persistence-Based Framework for Trade Secret Risk."
In preparation

1) **Gene Yang** (2026). "Details Matter: Quantum Advantage in Three-Choice Prisoner's Dilemmas."
De Novo: Stanford OHS Research Journal (vol. 16)

Skills

Programming C++, Java, Python, JavaScript, HTML/CSS, Bash, Git, LaTeX
Data Analysis SciPy, Qiskit, R
