

Gene Yang

gyang7@uw.edu | gyang0.github.io | linkedin.com/in/gene-m-yang

Education

University of Washington – *B.S. Physics, minor Greek* *Expected 2032*
Stanford Online High School 2026
Relevant coursework: Light & Heat | Modern Physics | Introduction to Quantum Computing
Linear Algebra | Differential Equations | Real & Complex Analysis
GPA: 3.98/4.0

Awards

Selected, Schar Young Scholars Research Program, George Mason University 2026
Shortlisted, Asian Physics Olympiad Korean representative (17 nationwide; standard high schools) 2026
Selected, Boston University High School Honors Program, physics track 2025
Top 8% Score, F=ma Exam, USA 2025
Ribbon Award, CAMWS College Greek Exam 2026
1st Place, CAMWS International Latin Translation Exam 2025
Gold Medal, National Latin Vocabulary Exam 2025

Experience

Summer Intern, Dickinson College Commentaries, Dickinson College Jun 2026 – Jul 2026
• Used AI models and OCR software to create reading guides for Petronius’s *Satyricon*
• Analyzed 500+ pages of older commentaries to correct errors and update notes
• Published free online Latin resources for Dickinson College’s website

Selected Camper, International Physics Olympiad Training Camp, South Korea Jan 2026
• One of 45 campers chosen nationwide from standard high schools
• Attended daily lectures on solving olympiad-level physics problems
• Successfully completed all experimental labs, passed final theoretical exam

Junior Lab Assistant, Korea Advanced Institute of Science & Technology (KAIST) Jun 2025 – Jul 2025
• One of 100 chosen nationwide from standard high schools
• Collected lab data for experiments with PASCO Capstone
• Conducted heat engine & collision tests with KAIST faculty

Teaching Assistant, AP Computer Science A, Stanford Online High School Aug 2023 – Jun 2025
• Created Connect-4 simulation assignment (integrated into ’26–’27 syllabus)
• Held regular office hours, 2 hours weekly

Selected Papers

-
- 1) Arjun Kumar, **Gene Yang**, Turiya Misra, Francis Kagai (2026). “Quantifying Attacker Payoff in Harvest Now, Decrypt Later Attacks: A Persistence-Based Framework for Trade Secret Risk.”
In preparation
 - 2) **Gene Yang** (2026). “Details Matter: Quantum Advantage in Three-Choice Prisoner’s Dilemmas.”
De Novo: Stanford OHS Research Journal (vol. 16)

Skills

Programming: C++, Java, Python, JavaScript, HTML/CSS, Bash, Git, LaTeX
Data Analysis: SciPy, Qiskit, R
Languages: English, Korean
